

How To Map Your Fruit Tree

1. Sign up for an Endless Orchard Membership at <http://endlessorchard.com/sign-up/> or directly on the Map (endlessorchard.com/map)
2. First create a tree for your trails: <http://endlessorchard.com/map-create/> Give your trail a catchy title and set a starting point. You may also add a short description. (Even if you have a single tree to map, it needs to live in a trail.)
3. After creating the trail you will be able to add trees on the map. Just click anywhere on the map to add a new tree.
4. After adding a tree you may edit its details or even move it to a new location by dragging. (Note: remember to save your changes after moving it to a new location)
5. You can always see the trails you created under “My Trails” on the Map Page
6. COMING SOON:
 - Share your fruit trails,
 - search for other members’ trails in your area
 - bookmark your favorite trails.

**** Your fruit tree should be next to or on public space.***
